CIRCULATED CUTS —6-8 week lead time

CULTIVAR	DESCRIPTION	FLOWER TIME	PRICING	NOTES
Lemontree	Lemon Tree is a standout hybrid of Lemon Skunk and Sour Diesel, famous for its overpowering lemon aroma and greasy, dense buds. This cultivar shines as flower, delivering uplifting, euphoric, and calming effects that work well for daytime or afternoon use.	8 weeks	\$10/clone	200-clone min
Bickett (coming soon)	Bickett OG is an indica-leaning hybrid bred by Nic of LymeRising Farm, a DEM Pure cultivator who developed this Cherry Pie x GMO cross while treating Lyme disease with cannabis. Known for its loud garlic-fuel funk with light cherry undertones, Bickett OG delivers a heavy, full-body effect and consistently strong resin production. A favorite among hash makers for its clean washes and intense potency.	9-10 weeks	\$10/clone	200-clone min
Chem D	The Original Chem D is the legendary clone-only cut pulled from Greg's historic 13-seed Chem bag, widely regarded as the purest and most potent expression of the Chem family. It is known for a piercing garlic funk, sharp diesel bite, and a powerful terp profile that defined an entire era of American breeding. This heirloom selection became a cornerstone of modern genetics and remains the most authentic representation of true Chem. These clones give growers direct access to the real profile that shaped the lineage.	8 weeks	\$10/clone	200-clone min

UNCIRCULATED CUTS — Bred & Selected In-House, Unreleased · 6-8 Weeks

CULTIVAR	DESCRIPTION	FLOWER TIME	PRICING	NOTES
Blue Banana #2	Squat structure with a fast finish. Excellent hash and flower producer. True-to-name blueberry and banana terpene expression.	8 weeks	\$15/clone	200-clone min
Banana Hamma	BananaHamma is for growers who want big, Kush-forward plants with loud lemon-banana funk. This 60/40 indica-leaning hybrid suits commercial and home growers, plus extractors, who want high to XL yields, strong THC, and real hash performance.	8-9 weeks	\$15/clone	200-clone min
Root Beer Breeze	Rootbeer Breeze is for growers who want high yields, strong THC, and real hash performance with soda-and-banana terps. This strain suits commercial and home growers, as well as extractors, who need easy plants, big flower sites, and reliable resin numbers.	8 weeks	\$15/clone	200-clone min
Bananalicious	Bananalicious is for growers who want bright candy terps with a strong banana twist. This 65/35 indica-leaning hybrid suits commercial and home growers, plus extractors, who value high yield potential, steady THC, and good resin for hash.	8-9 weeks	\$15/clone	200-clone min
Dante's Bubble Gum	Dante's Inferno x Bubble Gum	8-9 weeks	\$15/clone	200-clone min
Watermelon Z Bubblegum	Watermelon Z Bubblegum Slips combine Watermelon Zkittles and Bubble Gum into a sugar-drenched, crystal-heavy cultivar with loud watermelon terps and uplifting euphoric effects	8-9 weeks	\$15/clone	200-clone min

EXCLUSIVE CUTS				
CULTIVAR	DESCRIPTION	FLOWER TIME	PRICING	NOTES
Disco Fever	Disco Fever's not just jar appeal, she's the whole deal. Perfectly shaped large buds, drenched in trichomes, break up nice, leaving your fingers sticky. Teeeeerrrrps are loud, a big giant whiff of Banana Cream Pie, follows up with some dank skunky overtones. Almost banana split whip cream candy when you crack a bud, but has that potent OG gas in there too. Effects start off fairly light and euphoric, but about 10 minutes in you'll notice your eye lids dropping levels. Smokes feels beautifully smooth and sweet leaving a candiesque flavor in your mouth. There's so many layers of aromas rich with flavors will have you feeling relaxed, calm and aware.	8-10 weeks	\$20/clone	200-clone min
